## **EDUCATION**

Computer Science B.S.

Expected 2025

Washington State University, School of Electrical Engineering and Computer Science

Pullman, WA

Arts & Sciences A.S.; GPA: 3.4

Transferred 2022

Bellevue College

Bellevue, WA

## **SKILLS**

JavaScript, NodeJS, React, React Native, CSS, Tailwind CSS, HTML, Firebase, Wordpress, Figma

## **WORK EXPERIENCE**

## **Web Development Contractor**

Remote

University of California, Los Angeles

Jun 2022 – Current

- Designed and prototyped website wireframes and high fidelity mockups in Figma for desktop and mobile view.
- Created a responsive multi-page ReactJS website using Tailwind CSS and NextJS that follows accessibility guidelines.
- Deployed a headless content management system using Wordpress with a custom theme that allows for straightforward content updates, per their requirements.
- Initiated and coordinated meetings for weekly design reviews, and collaborated with UCLA's IT department.
- https://tinyurl.com/3hhzhfm5

Barista

Pullman, WA

Starbucks May 2022 – Current

- Demonstrated excellent customer service in a fast-paced environment, received frequent accolades for a positive demeanor and strong work ethic.
- Coordinated with team members to achieve the fastest drive-thru time in the district, which prompted admiration from Starbucks corporate headquarters in Seattle.
- Utilized product sampling and other upselling techniques to create more sales opportunities by exposing customers to additional products.

# **Web Development Contractor**

Remote

University of California, Los Angeles

Aug 2020 – Jan 2021

- Created a multi-page HTML5 website utilizing the Bootstrap design framework, prioritizing ease of extensibility.
- Collaborated with the head of UCLA's quantum physics department and a student designer to publish an HTML5 website from scratch.
- https://www.cgse.ucla.edu/

#### **PROJECTS**

### **Upload Work Schedule to Google Calendar - App** Self-Motivated Project

- Created a React Native app that converts a photo of the users work schedule to entries in their Google Calendar.
- Integrated Google Vision API with Firebase Functions to find work shifts in the photo of the user's work schedule.
- Added user authentication with Google Single Sign-On to authenticate and upload shifts to the user's calendar.
- <a href="https://github.com/swanzeyb/schedule-app-rn#readme">https://github.com/swanzeyb/schedule-app-rn#readme</a>

#### Recreated Battleship Game with ASCII Graphics in C Class Project

- Created a game scene manager using higher-order functions to mutate and display the game state in real-time.
- Added OSX support by conditionally compiling OS specific functionality to allow reading single characters from the standard input buffer, which is not permitted by default on OSX.
- https://github.com/swanzevb/CptS121/tree/main/PA6
